

[Cladding **Materials**]

Standard Clear

720 gauge Clear UVI/EVA 5 season guarantee. Good quality economical film for crops with good light transmission.

Standard White

720 gauge White UVI/EVA 5 season guarantee. For growing plants requiring shade and cooler day temperature.

"Recommended for use with nursery stock, conifers and ferns."

Luminance THB-AF

720 gauge UVI/EVA Anti-Fog High Diffusion 5 season guarantee. High light diffusion with internal greenhouse temperature reduction with AF to reduce condensation problems and Botrytis.

"Recommended for use with nursery stock and ornamental plants which require good growth."

Politherm +

720 gauge UVI/EVA Thermic Anti-Fog 5 season guarantee. Good heat retaining film with AF to reduce condensation problems and Botrytis. Provides standard diffused light transmission.

"Recommended for use with bedding plants, flowers, salad crops and strawberries."

Shade Netting

A complete range of green monofilament shade netting. Available in rolls of 2m or 3m wide - or made to measure sewn sheets.

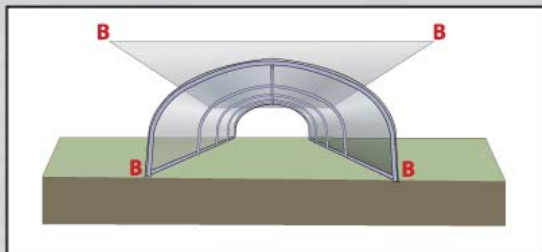

[Horticulture **Growing Houses**]

To calculate the width...

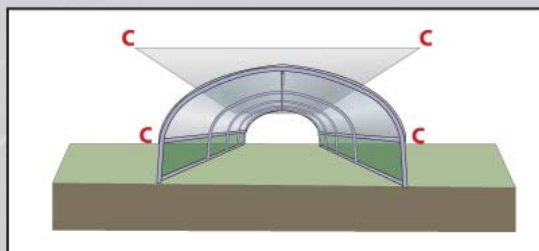

TRENCHING IN GROUND

A to A i.e. ground to ground plus approx. 2m extra (to line trenches).

ATTACHING TO BASE RAIL

B to B i.e. ground to ground plus 1m extra to fit.

ATTACHING TO SIDE RAIL

C to C i.e. side rail to side rail plus 1m to fit.

What size of sheet do I need?

To calculate length of sheet:-
Height from ridge to ground
x 2
+ 2m
+ length of structure
= Length of sheet required
